WHO IS BOMBER?

Bomber was born from a dream: to bring the best of alpine culture to those seeking one-of-a-kind experiences. After a day on our skis, you won't just notice the difference—you'll feel it.

Our ambition is to create the world's finest skis—designed to give every skier unmatched confidence, control, and joy in all conditions. Exceptional equipment makes for an exceptional experience.

Every day in the mountains is precious. At Bomber, we make every turn and every moment a lasting memory. Our skis give you the confidence to explore and the freedom to enjoy.

AIM BEYOND™ — WE GO BEYOND WHAT'S POSSIBLE

We go beyond the ordinary, bringing innovation, design, engineering, and craftsmanship into perfect balance—for skiers who seek the extraordinary. At the heart of the Italian Alps, amid the scent of fine wood and sparks of creativity, our skis are handcrafted in small, exclusive batches. Here, craftsmanship is more than a profession—it is a heritage. Our master craftsmen transform raw materials into works of art, each ski embodying precision, passion, and uncompromising quality.

The result is skis that combine the latest technology with materials once reserved for Olympic champions—a fusion of tradition and the future, made for pure performance and timeless elegance.

Bomber skis are more than a tool—they are an extension of you. They follow your movements intuitively, initiate turns with ease, and glide smoothly through the snow. Whether you're carving your first lines or chasing powder in the backcountry, Bomber elevates both performance and feeling—every time.

Bomber is your drive, your tool for pure exhilaration. You've never experienced skiing like this.

MORE THAN SKIS — A GLOBAL PASSION

Behind all our technology and innovation is a simple goal: to share the joy of every run. Skiing is even better when shared.

Join Bomber's global community of passionate skiers—and experience The Bomber Difference.

A LIFELONG PASSION — THE PURSUIT OF PERFECTION

A love of the sport and the alpine lifestyle—together with an unwavering pursuit of perfection—is the personal story at the heart of Bomber's message.

As a leading luxury entrepreneur, our chairman, Robert Siegel, first skied at just two years old. As a teenager, he attended the renowned Green Mountain Valley School in Vermont—a legendary breeding ground for Winter Olympians—where he and his classmates trained six days a week. There, they learned to push their limits, refine their technique, and develop an uncompromising focus on performance.

But the experience also shaped something deeper in Robert: the conviction that becoming the best means reaching beyond everything you believe is possible—and Aim Beyond™.

This is the heart of Bomber.

That mindset stayed with Robert when he and KT Bren acquired Bomber in 2013. It took just one click into the binding and one run to realize Bomber was in a class of its own. Since then, Robert's goal has been to share the euphoria he felt—especially with beginner and intermediate skiers—so they too can experience the joy of perfect flow on skis.

That passion and belief now run through everything we do. Our craftspeople and team carry the same philosophy forward: each day begins with a shared goal—to unite creativity, innovation, and savoir-faire to elevate the luxury performance experience.

“When I competed as a teenager in the 1970s, I dreamed of creating skis that could elevate every skier—so they could feel the same euphoria I do. Bomber skis make that possible, giving skiers of every level the chance to reach their personal peak and take their alpine experience far beyond expectations.”

— Robert Siegel, Head of Bomber

BOMBER AMBASSADORS

Marc Girardelli
2014 – 2016

“The stability of the skis and lack of vibration make them much more stable and secure, resulting in a significantly more comfortable and satisfying skiing experience. The attention to detail and quality of craftsmanship are unmatched in the industry.”

Bode Miller
2016 – 2020

“For the first time, I’ve found a ski company that lets every skier experience quality usually reserved for the world’s best. I want to share that joy with others. Bomber skis give skiers complete control, even when conditions aren’t ideal—a benefit intermediate skiers may value as much as, if not more than, experts.”

KC Oakley
2016 – Present

“In more than 12 years as a competitive skier, I’ve never seen a ski company put as much energy into every pair as Bomber does. Beginners and pros alike can trust that they’re skiing on the highest-quality skis.”

BOMBER CRAFTSMANSHIP

HANDCRAFTED IN ITALY — THE FINEST ITALIAN SAVOIR-FAIRE

At Bomber Ski, we take a different approach to ski-making—one rooted in craftsmanship and an uncompromising drive to exceed the expectations of the most discerning skiers. Our master craftsmen hand-build every pair of Bomber skis at our own factory in Cossato, Italy.

Our factory is a true artisan atelier, free from mass production. Each model is made in limited batches to ensure the highest quality and pure performance—drawing on expertise shaped by centuries of dedication, precision, and the pursuit of perfection. This is a quality industrial mass production simply cannot achieve. Our lead design engineer, with more than 40 years of experience, works side by side with craftspeople who have full creative freedom to source the finest materials and use every available means to build the world’s best skis.

At Bomber, we value time-tested techniques and the world’s finest materials, combined with cutting-edge innovation, design, and technology. Our goal is to create skis whose performance exceeds the ordinary and whose quality is usually reserved for Olympic champions. Each pair takes three days to make, with every step carefully completed by hand. Every detail is assessed, every material thoughtfully selected, and every design refined for flawless performance.

Our skis are made not only to perform, but to inspire. Every run should become a memory, every turn a discovery. That’s why we put time, care, and heart into every pair, as if we were making them for our own family—we consider the Bomber community part of that family. Whether you’re an expert chasing the ultimate carving turn or a recreational skier who loves the alpine life, Bomber skis elevate your experience, exceed your expectations, and give you the confidence and control to master the mountain.

We Aim Beyond™ in every detail—from design and engineering to material selection and craftsmanship—with an uncompromising focus on perfection. Bomber skis redefine what’s possible on the mountain and make every run unforgettable. We don’t just build skis; we create equipment that lets you experience nature, share the mountain with passionate skiers, and enjoy the journey.

MATERIAL QUALITY AND INNOVATION

The best skis start with the finest, most innovative materials and components. At Bomber, we source the world's most performance-driven, technologically advanced materials so every ski delivers exceptional power, precision, and stability.

Unlike mass-produced skis, which often use prefabricated, standardized components, every Bomber ski is measured, cut, and assembled by hand for a perfect fit and unmatched precision.

We treat the topsheet as a work of art, but function always comes first. Every material has a carefully considered purpose.

Every ski starts with a full-length wood core, from tip to tail—the heart of the ski and the key to how it feels underfoot. Wood cores deliver excellent response, rebound, stability, liveliness, and durability.

For laminates, or reinforcement layers, we choose only the highest-quality materials—the same materials used in skis for the world's top alpine athletes.

CARBON FIBER

We use premium carbon fiber for low weight, torsional stiffness, and maximum response—delivering dynamic, precise performance.

ALUTEX FIBER

Our exclusive Smart Flex Alutex fiber offers the versatility of a full ski quiver in one pair. It responds powerfully in aggressive turns yet feels easy and relaxed when cruising.

TITANAL

We use the finest Titanal, an aluminum alloy that dampens vibration and delivers exceptional stability—essential for precision at high speeds.

ABS SIDEWALLS

The sidewalls strengthen power transfer, increase torsional stiffness, and absorb vibration for an exceptionally smooth, controlled ride.

HANDCRAFTED WOOD CORE — CUSTOM-BUILT FOR EVERY SKI

CUTTING AND SHAPING

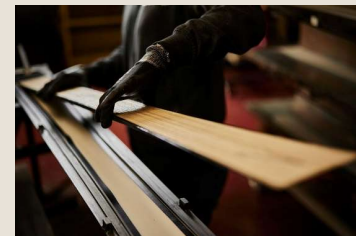

Each wood type is selected for the model's purpose, blending lighter and harder woods to suit the desired performance and terrain. Every core is designed, measured, cut, shaped, and assembled by hand.

Prefabricated industrial cores don't meet our precision standards. Our master craftsmen are Italian artisans whose expertise is part of a rich cultural heritage.

PRESSING

Materials are layered into the ski and pressed by hand, with a radius and layer structure tailored to each length. Every size gets a unique construction: longer skis are stiffer and more powerful for larger or more aggressive skiers, while shorter skis are more forgiving.

TESTING

Every new model is tested for two years on all types of snow and terrain before launch. Our lead engineers have more than 40 years of experience, and a product is finished only when they are completely satisfied. Perfection is the only acceptable standard.

FINISHING

Our quality control is unmatched. We analyze the flex, camber, rocker, and tune of every ski before approving it for delivery. Each ski passes through our master craftsmen's experienced hands and is approved by lead engineers—a process that takes three days per pair.

Every ski receives an NFC chip with a serial number, also engraved by hand on the sidewall, plus factory-setting information so the ski can always be restored to its original tune in the workshop.

PISTE

Engineered to be intuitive, nimble and blade-sharp on groomed snow, hardpack and ice.

SUPER PRO-CARVE 70

Built with a full wood-core sandwich construction, the Super Pro-Carve delivers exceptional edge grip, stability, and responsiveness — powerful yet remarkably intuitive.

At 70mm underfoot, it's engineered for groomed terrain, carving effortlessly from sweeping GS arcs to quick slalom turns.

A durable teak top sheet tops a poplar-and-ash wood core, while a carbon fiber Power Strip boosts torsional rigidity for explosive acceleration and precise edge-to-edge control. Carbon fiber Anti-Vibration Targets at the tips cut vibration and flex for a smoother, more stable ride at speed.

The result: agility, stability, and carving excellence in perfect balance.

Marker X-Cell Bindings and race plate included.

SPECIFICATIONS

- 70mm underfoot.
- Meticulously hand-crafted in our Italian factory in a limited run of 100 pairs.
- Metal sandwich construction.
- Poplar / Ash wood.
- Teak wood top sheet seamlessly embedded with a carbon fiber Power Strip.
- Anti-Vibration carbon fiber tips to eliminates vibration, and bolsters edge-grip.
- Each Bomber Ski is equipped with an NFC chip, allowing you to access and store information.
- Tuning: 1.0°.
- Edge Angle: 87°.

PRO CARVE 70 CARBON

Bomber's Pro-Carve is the ultimate hybrid ski, built for advanced skiers who crave speed, precision, and versatility.

These handcrafted skis are made with a full wood core 'sandwich construction', ensuring an extraordinary degree of consistency and a responsive, effortless feel that breeds confidence.

The Pro-Carve is the perfect balance between a Slalom and GS Race Ski, ideal for non-FIS races. Whether you're carving sweeping, high-speed GS arcs or snapping tight slalom turns, the Pro-Carve delivers the best of both.

Marker bindings included (Xcell 14 FDT).

SPECIFICATIONS

Developed and designed with former Olympic and World Cup champion alpine racer, Bode Miller.

Full wood core construction.

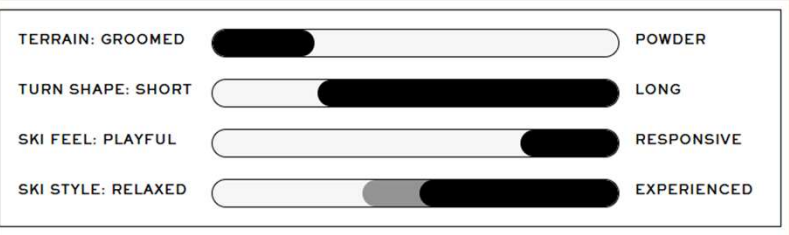

Sandwich construction featuring Titanal, fiberglass, compound sidewall.

Base: PTEX 5920.

Equipped with unique NFC chip which details make, serial number and tuning information.

Tuning: 0.8°.

Edge Angle: 87°.

ALL MOUNTAIN

Discover our range of all-mountain skis built for smoothness, stability and response.

BOMBER®
AIM BEYOND

ALUTEX 78

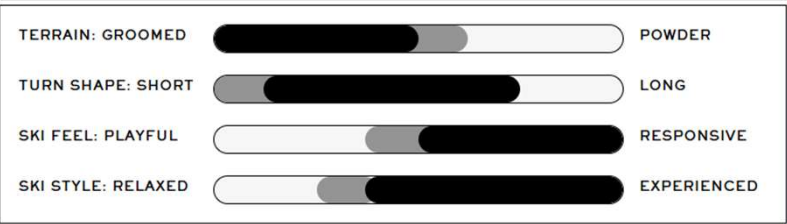

The most dynamic and versatile on-piste ski in existence, the All-Mountain Alutex adapts seamlessly to your every move through all terrain and conditions.

Exclusive to Bomber, our Smart Flex Alutex fiber provides the versatility of a full quiver in a single pair, powerfully responsive when charging and effortless when cruising.

The combination of our lightweight paulownia wood core, Alutex, and layers of Titanal to dampen vibration, intuitively delivers an incredibly smooth and responsive ride. Embrace the future of skiing with unmatched performance and versatility.

SPECIFICATIONS

- 78mm underfoot.
- On-Piste performance with off-trail capability.
- Top sheet seamlessly embedded with Alutex fiber.
- Full Paulownia wood core construction, sandwiched with two layers of Titanal.
- Base: PTEX 5920.
- Equipped with unique NFC chip which details make, serial number and tuning information.
- Tuning: 1.0°.
- Edge Angle: 87°.

A photograph of three snowboards standing vertically in a snowy mountain landscape. The snowboard on the left features a colorful, abstract design with a green face and yellow text. The middle snowboard has a black and yellow pattern with a red and blue circular logo. The snowboard on the right is blue with white and yellow graphics. In front of the snowboards is a white helmet with a clear visor reflecting the snowy scene. The background shows snow-covered mountains under a clear blue sky.

ARTIST SERIES

Explore our powder skis, designed for agility and speed in deep snow, bumps and backcountry conditions.

BOMBER ARTIST SERIES

The Bomber Artist Series captures the style and playful spirit of winter sports—for those who want to stand out on the slopes.

Bold, iconic designs by American pop and street artists Jean-Michel Basquiat and Keith Haring let adventurers express their own original style through these limited-edition skis and helmets.

Made with the same premium, performance-enhancing materials as our signature skis—and featuring full steel edges—these models showcase instantly recognizable graphics, shapes, and colours that art lovers will appreciate.

Designs include Basquiat’s all-white “Evil Thoughts” and Haring’s colourful “Flag Dance.”

Selected artworks also feature on our Italian-made, hand-painted ABS helmets.

ALL MOUNTAIN SKI BOMBER X BALMAIN

— Where Alpine Elegance Meets Parisian Couture

With a striking design inspired by the fashion house’s iconic heritage pattern, the exclusive Balmain All-Mountain Ski builds on Pierre Balmain’s distinctive legacy—a harmonious blend of the liberating spirit of alpine sport and the refined elegance of Parisian haute couture.

Raised in France’s magnificent Savoie region, surrounded by snow-capped peaks, Pierre Balmain learned early from his strong-willed mother, Françoise, that skiing symbolized freedom. Like her, he spent winters on the steepest alpine slopes. His lifelong passion for active life in his home region shaped many successful collections, where elegant ski and après-ski silhouettes became part of his signature “New French Style.”

Today, Bomber carries this remarkable legacy forward through a unique partnership with Balmain—a limited-edition all-mountain ski that unites alpine adventure with Parisian refinement.

The ski is handcrafted with a full wood-core construction and wrapped in a modern interpretation of the house’s striking Mini-Monogram pattern—a motif Pierre Balmain first presented in his couture shows in the early 1980s.

The result is a ski with exceptional on-piste performance and the versatility to venture off-piste—a perfect balance of technical precision and timeless style.

BOMBER SKI HELMETS

STEALTH ABS HELMET

The hand-painted Stealth Black ABS helmet is ultra-light yet highly durable, designed for endurance, protection, and timeless elegance.

STEALTH WHITE HELMET

STEALTH BLACK HELMET

SPECIFICATIONS

- Ultra-lightweight—just 590 g for maximum comfort
- Extra-wide field of vision
- Removable, scratch-resistant polycarbonate visor shields eyes from wind and snow while ensuring clear, fog-free vision
- Replaceable Oikos fragrance system keeps the inside of the helmet fresh and hygienic for up to 8 months
- “2dry” moisture-wicking technology quickly disperses sweat and dries fast
- Sanitized padding with antimicrobial treatment helps protect against bacteria and fungi
- Hand-painted with eco-friendly, UV-resistant paint
- Chin strap with metal buckle and loop for easy release
- Goggle holder at the back of the helmet
- Supplied with a soft storage bag
- Sizes: XXS | XS | S | M | L | XL | XXL | XXXL

BOMBER GOOGLES

AIM BEYOND GOOGLES

Bomber’s Aim Beyond HD Ultra Vision goggles are high-performance eyewear designed to enhance vision in all conditions. The frameless design provides an expansive peripheral field of view, while magnetic photochromic lenses adapt to changing light for clear vision in any weather.

Each pair comes with two anti-fog, scratch-resistant photochromic lenses that attach magnetically to the frame: a midnight-blue lens for sunny and partly cloudy conditions, and a replaceable yellow lens for low light, dense fog, or overcast days.

The goggles provide UV protection and the versatility you need to enjoy the entire ski season.

SPECIFICATIONS

- Photochromic blue lens included—ideal for sunny and partly cloudy conditions
- Photochromic yellow lens included—for foggy and overcast days
- Automatically adapts to bright sunlight
- Color-optimized lenses enhance depth perception
- Reduces eye fatigue and sun glare
- Non-slip silicone keeps the adjustable strap comfortably in place
- Airflow technology keeps lenses fog-free in all conditions
- Designed to improve vision during outdoor sports and activities
- Quickly responds to changes in light and environment
- 100% UV protection (UVA and UVB)

BOMBER

SKI POLES

CLASSIC SKI POLE

Engineered for high performance and a sleek, timeless look, our classic ski pole is designed to last a lifetime. Crafted from lightweight aluminum with ergonomic comfort fit grips.

SPECIFICATIONS

- Lightweight aluminum
- Sizes: 110,115,120,125,130,135

CARBON SKI POLE

Innovative and future-forward design with maximum performance. Ultra lightweight with comfort fit grips wrapped with eco-leather.

SPECIFICATIONS

- Ultra lightweight carbon poles
- Sizes: 110,115,120,125,130,135

BOMBER BASELAYERS

X-BIONIC BASE LAYERS UNISEX

Patented materials and dynamic weaving outperform other options on the market: they help cool your body after activity while keeping you warm at rest. This crew-neck top is knitted for a close yet flexible fit, giving you full freedom of movement while staying in place.

SPECIFICATIONS

- X-Bionic® Partial Compression® technology reduces muscle vibration, improves nutrient and oxygen delivery, lowers heat and lactic acid production, and promotes faster recovery.
- 3D Bionic Sphere® system with Thermosyphon® technology keeps you cool during activity and warm at rest.
- 37°C CCR technology maintains your core body temperature.
- Skin Nodor® technology inhibits bacterial growth and prevents unpleasant odors.
- ISO-PAD provides targeted insulation for individual body zones against the cold.
- Insulating pads on the upper thighs provide extra warmth.
- Expansionknee® protects against cold, even when the knee is bent.
- IDEO ergonomically shaped waistband improves fit while you move.
- Interlap Airconditioning Zone® promotes airflow along the inner thighs.
- Airconditioning Spot prevents excessive cooling behind the knee.

X-BIONIC COLLECTION - BLUE & RED - UNISEX

BOMBER SUMMARY

Bomber Ski combines craftsmanship, cutting-edge technology, and luxury to deliver an exceptional experience in every mountain condition.

Rooted in Robert Siegel's lifelong passion for alpine sports and the "Aim Beyond™" philosophy, Bomber creates skis that inspire confidence, precision, and flow—at every level.

TECHNOLOGY AND INNOVATION

- Full wood core in poplar, ash, or paulownia for an optimal balance of weight and stability
- Carbon and Titanal reinforcements for added power and response
- Rocker and sidecut design for float in powder and control on groomed runs
- Integrated NFC chip for personal information, maintenance, and custom tuning
- Handcrafted materials and top sheet design combine aesthetics with function

BRAND VALUES

- A philosophy of perfection and continuous improvement
- Focused on performance, creativity, and the alpine lifestyle
- Skis that combine technical expertise with luxury and design

Bomber Ski is more than skiing—it is an expression of style, freedom, and uncompromising joy on the mountain, taking every skier's experience far beyond expectations.
