FEEL SUPERNATURAL

COLLECTION SS27
X-SOCKS

FOUNDED IN SWITZERLAND OVER 25 YEARS AGO, X-BIONIC WAS THE FIRST SPORTSWEAR BRAND TO TAKE A HIGHLY SCIENTIFIC APPROACH.

The X-Bionic story began with a goal to enhance athletes performance by turning sweat into energy. To achieve this, we combine a deep understanding of biomechanics with inspiration drawn from nature.

The result? New levels of performance year after year after year. We started with a sock. Then came a jacket. Today, X-Bionic holds more than 800 registered patents and is recognized worldwide as one of the leading brands in high-performance sportswear.

GAME-CHANGING TECHNOLOGIES – BACKED BY SCIENCE.

Just like the athletes who wear our gear, our engineers are constantly striving for that decisive edge.

High-tech research and innovative materials are pushing the boundaries of what's possible. Every detail is carefully considered, and manufacturing processes are continuously refined. What comes to life in the lab is perfected on Europe's trails, roads, and slopes – and beyond.

Groundbreaking innovations like our 3D Bionic Sphere® technology or TerraSkin sock-and-shoe system save energy and maximize athletic performance.

X-SOCKS

A pair of white athletic socks is shown against a white background. The socks are positioned side-by-side, with the left sock slightly behind the right one. The left sock features a large grey 'X' logo on the upper calf. The right sock has several grey vertical stripes on the lower calf and a prominent pink horizontal band across the heel. Both socks have a pink band at the ankle. The heel and toe areas are reinforced with a textured pattern. The words 'X-SOCKS' are printed in small letters on the heel of the left sock.

X-Socks from X-Bionic combine advanced textile engineering with proven performance. The series offers retailers a strong premium product with high customer loyalty, low return rates, and clear differentiation within the category.

A RANGE DESIGNED TO COVER MULTIPLE NEEDS

X-Socks offers models tailored to different activities, making it easy to build an attractive, high-converting category.

TECHNOLOGY THAT DRIVES DEMAND

X-Bionic is known for innovation. X-Socks are developed with advanced systems that enhance temperature control, support, and comfort — giving retail staff powerful selling points.

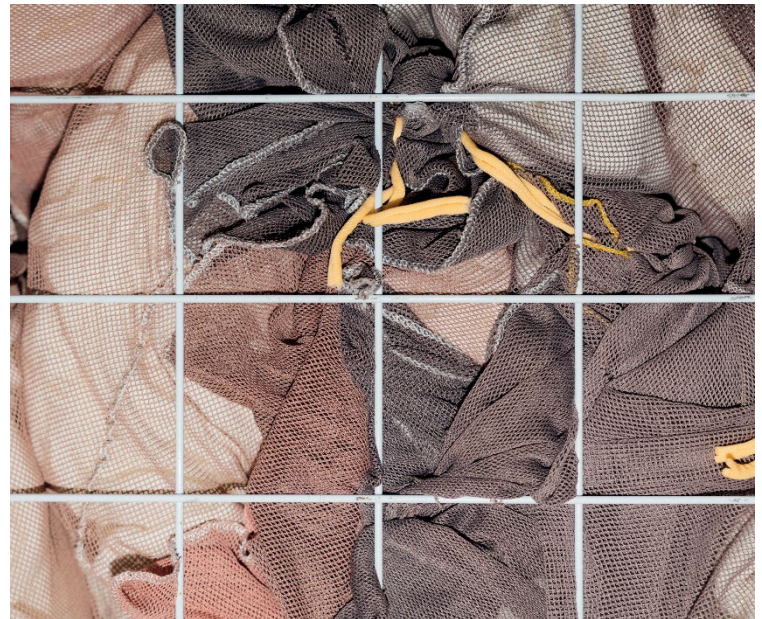

KEY TECHNOLOGIES:

1. 3D Bionic Sphere® System
2. Air-Conditioning Channel®
3. Anatomical Left/Right Fit
4. Reinforced Zones
5. Active Moisture Transport

YARNS MADE IN ITALY

Our yarns are born in Italy, where textile tradition meets innovation. Since the 1970s, Italian expertise has been shaping fibers that stand among the most respected in the world—blending heritage with cutting-edge technology to set new standards in the global textile industry. With state-of-the-art facilities and a forward-looking vision, our Italian partners create next-generation polyamide yarns that unite performance, quality and sustainability.

Every yarn carries the essence of Italian craftsmanship: precision, responsibility, and care for both people and the environment. This ensures that our textiles not only embody the prestige of “Made in Italy” but also reflect a commitment to innovation and a more sustainable future. The result is a unique fusion of tradition and technology—yarns designed to shape the fabrics of tomorrow.

KATEGORIER

MODELLER:

- RUN-SERIEN: Lette og pustende løpesokker med optimal støtte og komfort
- TRAILRUN-SERIEN: Robuste terrengsokker som gir ekstra beskyttelse og stabilitet
- BIKE-SERIEN: Tynne og presise sykkelsocker for maksimal kraftoverføring
- HIKE-SERIEN: Slitesterke tursokker med god demping og stabil støtte
- MULTISPORT-SERIEN: Allsidige tekniske sokker for variert trening og aktivitet
- SKI-SERIEN: Varme, tekniske sokker utviklet for vintersport og kalde forhold

ANATOMIX

EVOFIT TECHNOLOGY

Designet som en annen hud – tilpasser seg sømløst fotens naturlige konturer og gir en unik passform, overlegen komfort og ytelse på toppnivå i hvert steg.

Innovativ hælteknologi for målrettet stabilitet og støtdemping

Avansert sømkonstruksjon som beveger seg i takt med foten

Revolusjonerende 3D-tåkonstruksjon for naturlig spredning og balansert bevegelse

Høyfriksjonsbandasje som låser posisjonen og forbedrer ytelsen

Beskyttelse mot gnagsår

X-SOCKS TRAILRUN SERIES

Engineered for off-road performance, X-Socks Trail Run provide reinforced protection zones, enhanced stability structures and efficient moisture management. They are designed to absorb impact, reduce friction and maintain control on uneven and technical terrain.

ANATOMIX® TRAIL

Hva er forskjellen fra landeveisløping?

Best mulig demping – hvordan? Økt frottétykkelse gir bedre komfort og effektiv støtabsorbering på røft og ujevnt underlag.

Full kontroll – hvordan? Takket være gripe-garn (grip yarn) får du økt stabilitet og bedre kontroll i samspill med skoene.

X-SOCKS

WHY X-SOCKS IS A PROFITABLE CATEGORY

X-Socks offers a unique combination of quality, technology, and comfort. Retailers experience higher average prices, strong brand impact, and a product that practically sells itself through function and performance.

- Higher average price than traditional socks – without losing volume
- Strong brand with high recognition in the premium segment
- Proven technology that provides clear sales arguments
- Low return rate thanks to quality and fit
- Broad target group: running, skiing, trekking, everyday use

WE SUPPORT YOU IN SALES

To ensure strong sell-through, we offer:

- • Product training
- • Campaign materials
- • Display solutions
- • Social media content

WILLKOMMEN IN DER
SOCKENREVOLUTION.

XX BIO

TRAIL ANATOMIX®

Der menschliche Fuss ist ein biomechanisches Wunder. Doch in einer funktionellen Sportschnecke wird sein natürliches Potenzial eingeeignet. Deshalb haben wir Anatomix® entwickelt: Backen, anatomisch gefaltet nach dem Füssen und Waden für eine Passform wie eine zweite Haut. Mit patentierten 3D-Strukturen, die Ihre natürliche Performance unterstützen und schützen. Lauf wild.

ANATOMIX® TECHNOLOGIES

- 1 3D-SHAPED TOE**
Zehen werden sich spreizen – für Balance und Stabilität. Die anatomische Struktur gibt Ihnen das Gefühl.
- 2 ADVANCED BEAM**
Filtert störende Vibrationen ab, aber lässt ein angenehmes Waden-Gefühl zu.
- 3 ANKLE PROTECTION**
Im Knöchelbereich wird der Fuss durch die Schirmung geschützt. Dadurch wird das Risiko von Verletzungen reduziert.
- 4 HEEL TECH**
Für einen perfekten 3D-Fit. Kein Verschleiss, keine Kanten. Nur reibungsloser Kontakt.
- 5 HIGHGRIP BANDAGE**
Bei jeder Schritt des Fusses unterstützen Grip-Strips ein Band über das Tarsus.
